

/home/attila/src/qecc
-netbeans/qecc/Node.h

```
graph TD; A["/home/attila/src/qecc  
-netbeans/qecc/Node.h"] --> B[atomic]; A --> C[string];
```

The diagram illustrates a file path at the top, which then branches into two arrows pointing to the variables 'atomic' and 'string' below it.

atomic

string
